

# Quantum Resonance Crystal Bed

## Bio-resonance field

Our bodies are receivers and interpreters of vibrations. We have various organs that are designed to receive different types of vibrations. The eyes receive light, the ears sound, the hair touch or pressure, the skin temperature, the nose smell, the heart receives magnetic and multidimensional energy. If our eyes were readjusted so they could see what we hear, then the “sound” would have color. The same holds true for the other sensors our bodies have. The sensory systems are designed to give us a broad spectrum of information through various mediums so we can use our bodies effectively. At any given moment, the human body can instantly report what is happening around us and in us. When our bodies are performing sub optimally, they can sometimes be overwhelmed with vibrations that are not the highest. Moreover, when we use a self-limiting belief, then that will affect what we do with the vibrations in our field.

## Vibration based therapy.

The crystal bed can create specific vibrations through light, sound, magnetics, etc. and do so in a way that relaxes the client and allows the intentions to flow. The special binaural beats created through the headphones will turn off the brain and stop the self-limiting beliefs for the time on the system. The vibrations generated throughout the massage table are carried into every cell in the body allowing for the cells to feel the same resonance. Specific frequencies are being generated through the crystal holders and the crystals are sending that information into the subtle energy body. Inside these holders is magnetic as well as light information. Because we are adjusting and resetting so many of the bodies information systems, we can then have amazing results. Homeostasis and wellbeing can occur in the body and allow the natural organic flow of energy and information to infuse the cells and subtle bodies of the client.

The great feeling aftereffects of the system typically last for days. When a client can use the system in a repetitive fashion for four to six weeks, then they will find lasting results. The reason for this is the replication of cells. As the cells in the body wear out and are replaced by new cells, they use the frequencies available for coding and information. When the cells have a consistently high vibration to work with, then they will replicate with those frequencies in place.

## Types of modalities

The quantum resonance crystal bed uses several forms of energy which work together to form the basis of the system. We use light, sound, magnetics, and non-conformal energy as the fundamental building blocks. Within each of these are various subsections.

- Light
  - UV- creates a safe light that allows the cells to be receptive to change. Supports Vitamin D production
  - IR- IR is a proven to reduce inflammation within the cells.
  - LED- specific frequencies of light given to meridian/Chakra points are beneficial to optimal health.

- Magnetic
  - PEMF- Our Pulsed Electro Magnetic Fields are used in conjunction with the crystals to produce advanced Scalar fields. The frequency programmable PEMF coils are hand made and can use additional PEMF devices like RIFE and TENS units.
- Sound
  - Physical vibration- allowing complete cellular immersion into specific frequencies for fast shifts and amazing transformation.
  - Binaural beats- De-programing the brain from the thoughts that no longer serve and aligning a cohesive state between the left and right hemisphere. Choose from over 45 different custom-made music tracks or bring your own music.
- Non-conformal energy
  - Tensor fields- Structured energy fields that enhance the energy of the crystals.
  - Scalar- Produced from multiple sources in the system, Scalar is a multidimensional information system for the body. This allows the instructions for change and health to permeate all the cells.
  - Orgone- Frequency derived information from the essential oils and fine minerals/ gems.

By selectively combining these types of energies, we can effectively increase the potential for wellbeing or health.

## Operation

We have been refining the system for over 6 years and feel that we have created a very advanced and simple to operate system.

The client lays on the table, picks the music (or you do) set the lights, headphones and adjust volumes. Come back to the client when the session is almost over to welcome them back from the session.

The system is synergistic with other modalities, and we have had even greater success with acupuncture, Reiki, massage therapy and other forms of energy work.

Combine the system with other modalities or use it as a standalone pre/post treatment plan.

-safe for daily use

-no time limits

-easy training

-fast and effective results

-unattended treatment protocols available

-distance healing

## Pricing

The system starts at \$10,600 and flexible payment options are available.
