

User 's manual

SHMCI

Foreword

Thanks for chose the Yescool lossless music player.

In order to familiarize you with the operation of the machine as soon as possible, we have provided a detailed user manual, from which you can learn about product introduction, usage, system settings, and safety precautions. Before you use this product, be sure to carefully read all the information provided with the machine, which will help you to better use this product.

At the time of writing this manual, we were very careful and rigorous, and we believe that the information provided in this manual is correct and reliable. If there are any omissions, please do not hesitate to extend your support and eagerly welcome your correction. If you find any problems during the use of the product, please contact us in time, thank you for your cooperation!

Chapter 1 Before Use

1. Features

- A new generation of high-fidelity digital lossless music players;
- High-precision CNC aluminum alloy shell manufacturing process;
- High-definition 2.0-inch true color TFT color display, lyric display function;
- Professional DSP audio decoding IC+ imported DAC dual decoding, effectively restore the real scene;
- Professional low-noise pre-stage voltage amplification + post-precision current amplification amp, thrust shock;
- The disc encoder can quickly find the track function, convenient and quick;
- Intelligent song classification function, which can search by album, artist and style;
- Album cover function, breakpoint memory function, can remember the boot volume or custom volume;
- Support MP3, WMA, WAV, FLAC, APE, ACC, OGG, AIFF, DSD64 and other music formats, outstanding performance;

- Support CUE track decoding function;
- Equalizer function, including rock, pop, soft, jazz, classical, electronic music sound effects;
- Multi-task operating system, energy-saving settings, custom shutdown time;
- Multiple play modes: single repeat, all repeat, random play;
- ☑ My favorite, join the playlist feature;
- Line output function, output level can be synchronized with the volume, -6DB, 0DB optional;
- Music files can be deleted on this device, key lock function;
- Upgradable to multiple languages, support for local firmware upgrades;
- Built-in lithium battery

2. Accessories

1. Player 1
2. Certificate of Conformity 1
3. User Manual 1

4. Warranty card 1

5.USB cable 1

Note: If any of the above accessories are changed, please refer to the actual contents in the box.

3. Product Safety Information

WARNING: Failure to comply with these safety instructions could result in injury and danger!

- Do not drop or hit the player violently. Doing so may result in serious damage or malfunction.
- Do not open or disassemble the player. There are no parts to be maintained.
- This product should not be used in humid and hot environments. Do not put this product into water or any liquid.
- Do not expose the product to sunlight or place the product in a fire. The battery may explode and catch fire.
- If you do not use it for a long time, please charge the product every two months and discharge it once.

5. Information

Information: Player software version information and disk space respectively.

6. Auto update

This machine supports the local upgrade function. When the official firmware is released, it can be copied to the disk system for automatic upgrade.

7. Formatting device

Format the device: press the “MENU” button to enter, then press the “|◀◀” button or “▶▶| ” button to select Yes or No, press the “MENU” button to confirm and exit. (Note: all data cannot be recovered after formatting)

8. Factory settings

Factory setting: It can be restored to the factory settings.

Chapter 5 Connecting to a Computer

1 Connect to a computer

In order to download and upload files from your computer, connect the USB port of the PC to the unit with the supplied USB cable, and it will automatically turn on when connected.

The first time you connect, the computer will promptly create a driver information base, find new hardware and other information, you can automatically detect the machine. The display shows as shown on the right, indicating that the connection was successful.

2 Upload download file

The drive icon appears on the PC like right pictures under Windows system.

3 Disconnect from the computer

After the file transfer is complete, please close my computer or explorer and then unplug the cable as follows.

For users of WINDOW 2000 or higher operating systems, follow the steps below:

- Click the green arrow in the lower right corner of your computer.
- Click to stop USB Disk - drive

- After the Safely Remove Hardware dialog box appears, click OK to remove the USB cable.

Reference: Different operating system picture tips are slightly different, the above picture is for reference only.

4 Battery and charging

This unit has a built-in lithium battery. You can charge the unit by connecting the computer with the supplied USB cable. When charging, the battery icon will cycle. When the battery is full, the battery full icon () will be displayed. The built-in lithium battery can be fully charged in about 2.5 hours.

Note: If charging with an adapter, please use the maximum output is 5V, 1A charger for charging.

5 Troubleshooting

- **The player does not display when the power button is pressed.**
- The cause of the fault and its troubleshooting method: The lithium battery has no power, so please charge the lithium battery in time.
- If the player freezes, press the “RESET” button to reset the system and restart it. If it still does not turn on, check if the battery is dead.
- **No sound when playing a file.**

The cause of the fault and its troubleshooting: the volume is too small, adjust the volume; or there is no music file in the player,

please download.

➤ **Cannot download music files after connection.**

➤ Causes and troubleshooting: Your motherboard may not support the USB interface and you need to upgrade your motherboard driver.

➤ **Why is there sometimes a computer-side exception when plugging and unplugging the player?**

The cause of the fault and its troubleshooting method: mainly due to the USB plugging and unplugging during file transfer, it is recommended that the user do not disconnect during the transmission process to avoid causing the computer to be abnormal.

➤ **Why is the total memory display in the player inconsistent with the actual nominal?.**

Reason: Mainly because you need some memory space to store programs and display fonts, so the total memory you see is smaller than the actual nominal.

➤ **Why are some MP3 songs not playing properly in the player?**

The cause of the fault and its elimination: In the strict sense, MP3 refers to the music file compressed by the MPEG I Layer 3 standard. Most MP3 songs are currently in this format. When you encounter an MP3 song format that the player cannot match, you can choose one of the following two measures: 1)

Remove the incompatible song from the player to ensure the normal operation of the player. 2) When using the software to compress itself, please select the encoding method of MPEG I Layer 3.

- **Why can't I delete a file in the player through the management software? Or when I delete a file in the player, I am prompted "Delete failed or delete error"?** Use "My Computer" to check if the files in the player are read-only. If so, modify the read-only attribute to the archive attribute to delete it.

- **As a mobile hard disk, do I need to install a driver in WINDOWS XP/VISTA/WINDOWS 7?**
No need to install the driver. Currently does not support WINDOWS98 operating system.

7 Technical specifications

Name	无损音乐播放器
Capacity	内置 16G/32G/64G/128G 内存(可选)
Screen	尺寸: 2.0 英寸 TFT 显示 分辨率: 320*240 LCD 显示屏
Battery	内置锂电池: 3.7V 1500mAh
SNR	≥100dB
Resume play	Yes
Playback format	MP3 WMA WAV APE FLAC ACC OGG AIFF DSD64
Streaming rate	WAV 最大支持 64BIT 192KHz, APE/ FLAC 最大支持 24BIT 192KHz, AIFF 最大支持 32BIT 192KHz, DSD 最大支持 1BIT DSD64 3072KHz
Play time	Around 30H (Vol 50 屏保播放无损音乐)
Charging time	Around 2.5H (5V, 1000mA adapter)
VOL	100 级数字音量控制方式
Headphone Power	≥80mW
Temperature	-5°C ~ 40°C
Earphone out	双声道输出
Line out	音量同步、-6DB、0DB 可选

Interface	MICRO 5PIN USB2.0
Supports	WINDOWS XP/VISTA/WINDOWS 10
Dimension(L×W×H)	98mm*56mm*16mm
Languages	Chinese, English etc,
N.W	100 g (With battery)
